Professional Summary

Senior System Administrator with 8+ years of experience managing enterprise IT operations, identity and access management, endpoint security, and infrastructure services. Proven expertise in ITSM, SaaS and application administration, endpoint automation, and IT asset management across onsite and offsite environments. Strong background in incident management, SLA adherence, patch compliance, Google Workspace and Microsoft 365 administration, and SOC audit support. Recognized for owning production systems, improving operational stability, and delivering secure, reliable IT services in fast-paced enterprise environments.

Core Competencies

- Enterprise IT Operations & System Administration
- IT Infrastructure Management
- Identity & Access Management (IAM)
- Endpoint & Device Management (Ninja One)
- ITSM & Jira Administration
- IT Asset Management (Onsite & Offsite)
- Incident Management, RCA & SLA Adherence
- Patch & Vulnerability Management
- Google Workspace & Microsoft 365 Administration
- SOC Audit & Compliance Support

Professional Experience

Senior System Administrator

Pro-Vigil Surveillance Services | Sep 2023 – Present

- Manage end-to-end enterprise IT operations covering IAM, endpoint security, IT asset inventory (onsite and offsite), and ITSM using Jira and NinjaOne.
- Own incident management lifecycle including triage, root cause analysis, resolution, and SLA adherence across business-critical systems.
- Administer Jira workflows, queues, SLAs, automations, and reporting to support IT operations and leadership visibility.
- Lead endpoint management using NinjaOne, ensuring OS and application patching, zero-day remediation, monitoring, and compliance reporting.
- Administer Google Workspace (Gmail, Drive, Admin Console) including user provisioning, group management, security policies, and joiner–mover–leaver lifecycle management.
- Manage Microsoft 365 administration including user access, licensing, and security controls.
- Support SOC audit and compliance initiatives by providing IAM logs, endpoint security evidence, patch compliance reports, and audit documentation.

- Administer and manage enterprise SaaS, security, and collaboration platforms including KnowBe4, RingCentral, TeamViewer, Lucid, Scribe, Wrike, Adobe Admin Console, Jira, Zoom, Ninja One, Webroot, Sophos Endpoint/Firewall, and Ruckus Wireless.
- Oversee LAN and Wi-Fi infrastructure using Ruckus controllers and access points, ensuring secure and reliable connectivity.
- Drive continuous improvement initiatives to enhance security posture, reduce incidents, and improve operational efficiency.

System Support Specialist

Dynata | Dec 2021 – Sep 2023

- Supported enterprise IT operations with focus on endpoint management, IAM support, and ITSM processes.
- Provided L2/L3 support for Windows servers, desktops, and business applications in a global environment.
- Managed ticket resolution through Jira, ensuring adherence to SLAs and escalation procedures.
- Supported endpoint patching, vulnerability remediation, and security monitoring activities.
- Assisted with onboarding and offboarding processes, endpoint re-imaging, and asset tracking.
- Supported audit readiness by assisting with access reviews, endpoint compliance reports, and security evidence.

Technical Engineer

HBL Power Systems Ltd. | Jan 2021 – Dec 2021

- Supported IT infrastructure operations including servers, networks, and firewall management.
- Installed, configured, and maintained routers, switches, servers, and structured cabling.
- Troubleshoot network and system issues to ensure high availability and performance.
- Assisted with system upgrades, preventive maintenance, and security controls.

Earlier Roles

- **Network Engineer – NOC**, Pioneer Elba's Ltd. | Dec 2017 – Oct 2018
Monitored network operations, handled incident escalation, and ensured uptime across enterprise networks.
- **IT Support Engineer**, Progressive Infovision Pvt. Ltd.
Delivered desktop and infrastructure support, troubleshooting hardware, software, and connectivity issues.
- **IT Support Executive**, Piramal Swasthya Management & Research Institute | Feb 2019 – Jan 2021
Supported IT operations, user support, asset tracking, and basic infrastructure services.

Key Projects & Implementations

IT Infrastructure & Operations Management

- Administered Jira ITSM and NinjaOne platforms to support enterprise IT operations.
- Managed endpoint security, OS and application patching, IAM operations, and IT asset inventory.

- Handled incident management, SLA adherence, access provisioning, and compliance reporting.
- Supported SOC audit readiness through evidence collection, reporting, and access reviews.

Key Achievements

- Owned end-to-end IT operations for enterprise users with consistent SLA adherence.
- Reduced security risk through timely endpoint patching and zero-day vulnerability remediation.
- Improved access governance through structured IAM processes, reducing audit observations.
- Maintained accurate IT asset inventory, supporting audits and cost optimization initiatives.

Tools & Technologies

Microsoft 365, Google Workspace, Jira, NinjaOne, KnowBe4, RingCentral, TeamViewer, Zoom, Webroot, Sophos Endpoint & Firewall, Ruckus Wireless (Wi-Fi Controllers & APs), Adobe Admin Console, Wrike, Lucid, Scribe, Windows Server, Networking

Certifications

- Microsoft Certified: Azure Administrator Associate (AZ-104)
- Microsoft Certified Professional (MCP)
- Microsoft Technology Associate (MTA)

Education

Bachelor of Computer Applications (BCA) | 2014 – 2018

Additional Information

Languages: English, Hindi, Telugu, Odia

Strengths: Incident ownership, security-first mindset, process improvement, cross-team collaboration
